LUKOIL MID-EAST LAUNCHED FIRST SOCIAL WELFARE PROJECT ON RECOVERY BASIS

LUKOIL Mid-East (part of LUKOIL Group) will supply asphalt materials to Al-Qurna asphalt plant, including 7,000 tons of gravel, 7,000 tons of fine sand, 750 tons of asphalt cement, 150,000 liters of diesel and 74,000 liters of kerosene. It will allow local municipality to pave around 20 km of roads in the Medaina district.

The project has been proposed by Medaina municipality, approved by BOC and will be implemented through the local supplier. Unpaved roads present a problem for local citizens, especially in winter when the roads become muddy and full of rainwater. While improving road infrastructure, LUKOIL will give an impulse to the growth of local economy.

Representatives of Basra Provincial Council and Medaina municipality as well as LUKOIL and BOC staff attended the project launch. Provincial Council members expressed appreciation to LUKOIL and BOC for active cooperation and constant support of the local initiatives.
